

Policies and Procedures

New policies and procedures implemented through Moore Thriving Communities will go through the following steps:

Either the executive director or a board member will write up policies and procedures as needed and as issues arise.

The documents will be e-mailed to all board members, in preparation for a vote at the upcoming meeting. They will be sent at least 48 hours before the vote so that the members have time to review them.

The board of directors will vote on whether or not to implement the policies and/or procedures in question. (Two-thirds of the board members must approve each one.)

Approval dates will be included on all policies and procedures.

The executive director or a board member will post approved policies and procedures to the website.
